

SAVE THE ACANCOCHA WATER FROG

Did you know that in 2010 over 200 specimen were found, which includes tadpoles, adults, and juveniles. But in 2010 only 70 adults and 6 juveniles were found.

We NEED to help this species, and fast!

This near threatened population is only found in SEVEN locations around the world

The Acancocha Water Frog is a unique species, and because of the human population's actions, it is threatened
